

Allowing Cisco AnyConnect to coexist with Kaspersky Antivirus 2012

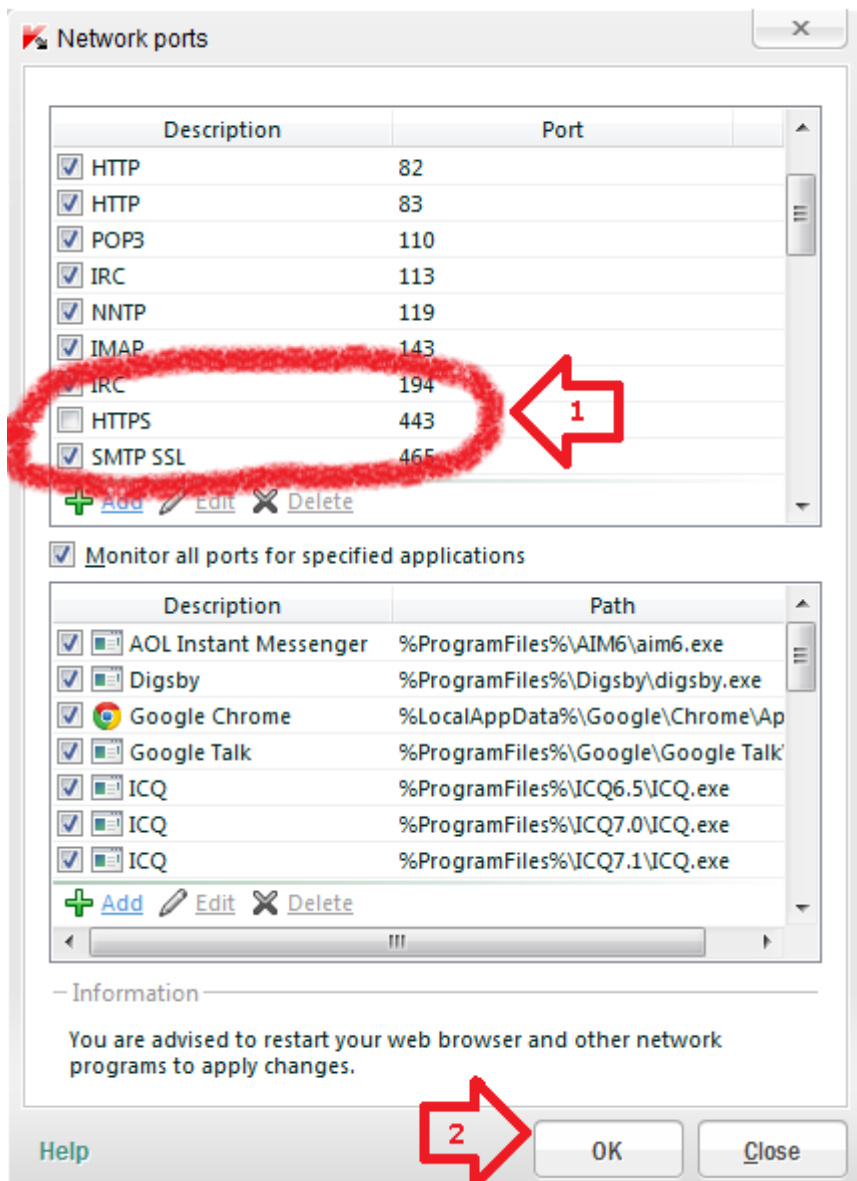

1. Open the Kaspersky management interface and click on **Settings** in the upper right corner

2. Click on the "Box" icon to open Advanced settings (marked with the arrow "1"), choose **Network** (arrow 2), and click on the **Select** button (arrow 3).

3. Remove the marking from the checkbox labeled **HTTPS 443**. Click **OK** to save the settings and **OK** again when returning to the previous screen.

4.
5.
